

# Blackhawk Plastic Surgery Welcomes Expert Plastic Surgeon, Tim Rankin MD

## FOR IMMEDIATE RELEASE

**Danville, California – 28<sup>th</sup> May, 2019 - [Blackhawk Plastic Surgery](#)** was established with the aim to provide state-of-the-art plastic surgery services to patients. Since its inception, it has strived to make people look and feel confident through sophisticated surgical procedures. Blackhawk Surgery brought innovation to multiple surgical and nonsurgical aesthetic procedures, including, but not limited to, facelift, breast augmentation, tummy tuck, laser procedures, Injectables and more. It was for this reason that they quickly won the trust of patients, which lead to the massive expansion of their surgical center and staff.

Henceforth, they have recently hired a highly qualified and professional plastic surgeon, Timothy Rankin MD, in their dedicated team of medical professionals. The addition of Dr. Rankin will only increase the already stellar experience offered to patients at Blackhawk Plastic Surgery. He is enthusiastic to bring invaluable experience and expertise to the practice.

Dr. Rankin attended Chapman University for undergrad and Ross University for medical school. He was also an esteemed research associate at the UCSF Dynamic Neuroimaging Lab where he studied ultra-short-term memory with an fMRI unit. Later, he took his general surgery training at the University of Arizona. His passion for performing plastic surgery took him to the prestigious Vanderbilt University program where he completed his plastic surgery fellowship.

Dr. Rankin is known for his hard-work, dedication and diagnostic prowess. He has a strong sense of work ethics which makes his patients feel at ease while undergoing complex medical procedures. His professionalism, competence and commitment towards his job makes him the most ideal candidate to join Blackhawk Plastic Surgery.

Stephen J Ronan MD FACS, President of Blackhawk Plastic Surgery, interviewed Dr. Rankin last year and says he was highly impressed with his competence and honesty. “Dr. Rankin is driven with a fierce desire to improve the quality of life of his patients. He is well-trained in all forms of aesthetic and reconstructive surgery. The cherry on top is that Dr. Rankin also performs surgery to cure migraine headaches, which will bring a new specialization that we can offer our patients. I quickly realized that Dr. Rankin was an apt choice and a go-to surgeon who will take Blackhawk Plastic Surgery to new heights while giving patients the best care and results through his expert surgical procedures. As many of you know, we undertook a massive expansion of the office and surgery center. This was partly to make room for Dr. Rankin.

“After almost ten years of surgical training and completing my plastic surgery fellowship at Vanderbilt, one of the top programs in the country, I searched the U.S. for a practice and partner that possessed values similar to my own. The ideal plastic surgery practice aims to achieve the highest quality outcomes based on a foundation of patient safety. I am overjoyed to be joining Dr. Stephen Ronan and Blackhawk Plastic Surgery. They both embody everything for which I searched,” says Dr. Rankin.

Patients can trust that they will be receiving the best treatment in the most advanced surgery center from the excellent team at Blackhawk Plastic Surgery, who will continue to raise the bar for providing sophisticated cosmetic services.

#### **About Blackhawk Plastic Surgery:**

Stephen J. Ronan, MD FACS, founded Blackhawk Plastic Surgery and Blackhawk Surgery Center. With the consistent growth and rapid success, the founder expanded the practice by doubling in size and taking on several skilled nurses and practitioners. Serving the community for more than 15 years, Blackhawk Plastic Surgery strives to provide with the excellent care with both surgical and non-surgical aesthetic procedures.
